B LEACHER SHEETINGS AND SHIRTINGS AND SHIRTINGS AND now offered in greatest variety and at very low prices. BAIN & BON,

Scrofula, or King's Evil,

is a constitutional disease, a corruption of the blood, by which this fluid becomes vitiated, weak, and poor. Being in the circulation, it pervades the whole body, and may burst out in disease on any part of it. No organ is free from its attacks, nor is there one which it may not destroy. The scrofulous taint is variously caused by meanigh disease. Les living diseases the living disease. caused by mercurial disease, low living, dis-ordered or unhealthy food, impure air, filth and filthy habits, the depressing vices, and, above all, by the venereal infection. What-ever be its origin, it is hereditary in the constitution, descending "from parents to children unto the third and fourth generation;" indeed, it seems to be the rod of Him who says, "I will visit the iniquities of the fathers upon

their children." blood of corrupt or ulcerous matter, which, in the lungs, liver, and internal organs, is termed tubercles; in the glands, swellings; and on the surface, cruptions or sores. This foul cor-ruption, which genders in the blood, deprethe energies of life, so that scrofulous constitutions not only suffer from scrofulous com-plaints, but they have far less power to with-stand the attacks of other diseases; conscquently vast numbers perish by disorders which, although not scrofulous in their nature, are still rendered fatal by this taint in the system. Most of the consumption which de-cimates the human family has its origin directly in this scrofulous contamination; and many lestructive diseases of the liver, kidneys, brain, and, indeed, of all the organs, arise from or are aggravated by the same cause.

One quarter of all our people are scrofulous; their persons are invaded by this lurking infection, and their health is undermined by it To cleanse it from the system we must renovate the blood by an alterative medicine, and invigorate it by healthy food and exercise. Such a medicine we supply in

AYER'S Compound Extract of Sarsaparilla

the most effectual remedy which the medical skill of our times can devise for this everywhere prevailing and fatal malady. It is com-bined from the most active remedials that have been discovered for the expurgation of this foul disorder from the blood, and the rescue of the system from its destructive consequences. Hence it should be employed for the cure of not only Scrofula, but also those other affecns which arise from it, such as Enurrive and Skin Diseases, St. Anthony's Fire, Rose, or Erystpelas, Pimples, Pustules, Blotches, Blains and Boils, Tumors, Tetter and SALT RHEUM, SCALD HEAD, RINGWORM, RHEUMATISM, SYPHILITIC and MERCURIAL DIS-EASES, DROPSY, DYSPEPSIA, DEBILITY, and indeed, ALL COMPLAINTS ARISING FROM VITIA-TED OR IMPURE BLOOD. The popular belief in "impurity of the blood" is founded in trath, for scrofula is a degeneration of the blood. The particular purpose and virtue of this Sarsaparilla is to purify and regenerate this vital fluid, without which sound health is impossible in contaminated constitutions.

AYER'S Ague Cure,

Intermittent Fever, or Fever and Ague, Remittent Fever, Chill Fever, Dumb Ague, Periodical Headache, or Bilious Headache, and Bilious Fevers, indeed for the whole class of diseases originat-ing in biliary derangement, caused by the Malaria of Miasmatic Countries.

We are enabled here to offer the community a remedy which, while it cures the above complaints with certainty, is still perfectly harmless in any quantity. Such a remedy is invaluable in districts where these afflicting disorders prevail. This "CURE" expels the miasmatic poison of FRVER AND AGUE from the system, and prevents the development of the disease, if taken on the first approach of its premonitory symptoms. It is not only the best remedy ever yet discovered for this class of complaints, but also the cheapest. The large quantity we supply for a dollar brings it within the reach of every body; and in billous districts, where FRVER AND AGUE prevails, every body should have it and use it freely both for cure and protection. A great superiority of this remedy over any other ever discovered for the speedy and certain cure of Intermittents is that it contains no Quinine or mineral, consequently it produces no quinism or other injurious effects whatever upon the constitution. Those cured by it are left as healthy as if they had never had the disease.

Fever and Ague is not alone the consequence of the miasmatic poison. A great variety of disorders arise from its irritation, among which are Neuralgia, Ilheumatism, Gout, Headache, Blindness, Toothache, Earache, Catarrh, Asthma, Palpitation, Painful Affection of the Spien, Hysterics, Pain in the Boucels, Colic, Paralysis and Derangement of the Stomach, all of which, when originating in this cause, put on the intermittent type, or become periodical. This "Cure" expels the poison from the blood, and consequently cures them all alike. It is an invaluable protection to immigrants and persons travelling or temporarily residing in the malarious districts. If taken occasionally or daily while exposed to the infection, that will be excreted from the system, and cannot accumulate in sufficient quantity to ripen into disease. Hence it is even more valuable for protec-We are enabled here to offer the community

that will be excreted from the system, and carnot accumulate in sufficient quantity to ripen into discase. Hence it is even more valuable for protection than cure, and few will ever suffer from Intermittents if they avail themselves of the protection this remedy affords.

Prepared by Dr. J. C. AYER & CO., Lowell, Mass and by Druggists and Dealers everywhere.

does not include it among the insects injurious to that plant.

The steel-blue or grape vine flea-beetle belongs to the family of Chrysomelians, to the old genus Altes or Haltica, and to the subold genus Altes or Haltica, and to the subold genus Graptodera. All the members of the genus Haltica are of small size, and are possessed of great leaping powers, the hind legs being largely developed for that purpose. Many are of bright colors. Their food consists of the leaves of vegetables, while in the larval and perfect states. In April, the grape vine fleabeetles issue from the ground, where they have passed the winter, and ascend the stems and branches of our cultivated and wild grapes, and eat into the buds that have just began to expand, leaving the outer woolly covering untouched, except at the point of entry, but devouring liant fortress that is to make Barrancas a Pick—

The steel-blue or grape vine fleabeetle belongs to the family of Chrysomelians, to the which more bye-and bye.

As to the fortress—my courier not being so far advanced in listrature as to be able to put one intelligible word on paper—I have failed to circumstances of the time when the United States differs from all other countries. The reason for this difference is to be found in the circumstances of the time when the United States differs from all other countries. The reason for this difference is to be found in the circumstances of the time when the rule was centerature as to be able to put occurred to the circumstances of the time when the rule was centerature as to be able to put occurred to the circumstances of the time when the rule was centerature as to be able to put occurred to the differs from all other countries. The Continue as a differs from all other countries. The United States differs from all other countries. The United States differs from all other countries. The United States had just each of the States differs from all other countries. The United States had just each of the United States had just each of the United States pand, leaving the outer woolly covering untouched, except at the point of entry, but devouring liant fortress that is to make Barrancas a Pickthe whole of the embryo leaves and blossom bude; thus destroying all hope of a crop of fruit square." the whole of the embryo leaves and blossom bude; thus destroying all hope of a crop of fruit that season, and permanently injuring the vines in many eases. When numerous, the entire crop of a vineyard is often destroyed by this means. In May, when the vine leaves are expanded, the ismale bettle deposits her eggs on them, and the young speedily hatch. They are the both leaves and blossoms, but are usually found feeding on the upper surface of the leaves, eating the parenchms in blotches, and leaving but the skeleton frame-work of nerves beneath. Its color is a light brown with eight rows of dorsal and lateral black spots; those of the dorsal being confuent; on each spot there is a single hair, the breathing aperture or traches have two; head and feetblack; antenna, very short legs, six thoracic and anal tuberole; length, four and a half lines. In walking, it often moves its body in that manner; the under side of the abdominal spent and the manner of the caterpillar of a geometer moth, bringing the tip of its abdomen up with a jerk, but it also crawls without moving its body in that manner; the under side of the abdominal spent the larved descends and enters the ground of the leaves and surface and interest of the control of the caterpillar of a geometer moth, bringing the tip of its abdomen up with a jerk, but it also crawls without moving its body in that manner; the under side of the abdominal and the properson of the caterpillar of a geometer moth, bringing the tip of its abdomen up with a jerk, but it also crawls without moving its body in that manner; the under side of the abdominal and the properson of the leaves and surface and interest the round of the caterpillar of a geometer moth, bringing the tip of its abdomen up with a jerk, but it also crawls without moving its body in that manner; the under side of the abdominal and the properson of the caterpilar of the

nal segments are swollen, presenting the appear-ance of minute prolegs. About the beginning of June the larve descends and enters the ground Even the iron fortrees affair may be only a length; thorrx and elytra impunetate; length; thorry and an antive insect; when approached, it will leap or fall to the ground and there cannot not have been committed."

In an antive insect, when approached, it will leap or fall to the ground and there cannot not have been committed."

The Pashions.

Even the iron fortrees affair may be only a length; thory and well in memory that not a day passes without operation by the assemblage of men for a purpoached, it will leap or fall to the ground and there cannot not have been committed."

that they cannot be used as a nursery by the beetle, and an unceasing war should be waged upon the insect at all times, and experiments carefully instituted to discover the best methods f destruction.

This is the most injurious insect to the vine in the wine growing districts of America, and with the increase of vineyards is evidently in-creasing in numbers; many persons in this vicinity nave suffered vero severely from it the

Tobacco and Patriotism. The Louisville Journal makes a practical appeal to the people of Kentucky to stand by the Union, and clinches its arguments in the following style:
Much apprehension seems to exist in the to-

bacco growing portions of Kentucky that slave labor will be exterminated, and our great staple ruined, if the State remains in the Union, and continues loyal to the Federal Government. Within the past few weeks we have noticed, in nearly all our local newspapers, especially those in the secession interest, urgent advice to our farmers to abandon the tobacco crop this year, and devote all their soil to raising breadstuffs modern beauty is to expand outward and down and meats. Now, the want of wisdom in this ward from the waist in the fashion of a fan;

and that is, that we continue true to the Unious tendering a deaf ear to the entreaxies, and if need be, armed resistance to threats of those who would lead us over the thorny and rugged road of Secession, civil war and shareby, to inevitable perdition—a perdition without excuse and without redemption. Let the Louisville, and Nashville Railroad, with branches which can readily and speedily be built, even as military necessities, be henceforward the route of Southern Kentucky to her tobacco markets.

A Scorch Jokk.—The most two precious things now enclosed in hoope are girls and kegs of whisky.

Flowers are largely introduced into ball dress—france it is stated that irreparable damage has been inflicted on the vince by the frost.

The Street-Blue Flea-Bretle-Gropioders chalybes.—This insect has been known since the practicability of creeting, nearer the navy chalybes.—This insect has been known since the practicability of creeting, nearer the navy yard than Fort Barraneas, a new impregnable from fortress, said to be the invention of some Mr. Hall, an enterprising Englishman, who sends journeymen around the world to build "indestructible forts for the best bidder." I believe that three of this gentleman's assistants and country of the old world; the "vine bestle" of Kollar being in no way related to it; but an all ei species—Hultice oleraces—was, in 1837, very lightions to the vine at Montpeller, France In this case, the insect was in the perfect state, and it does not appear that the vine constitutes its usual food. In England it feeds on the seed leaves of various plants, and is also found, during the summer, on the, hazel, which it does not appear to lighte much, as London does not include it among the insects injurious to that plant.

But President Davis' visit was an important one. He came here, I understand, to canvass the practicability of creating, nearer the navy farters and to canvass the practicability of creating, nearer the navy impregnable in the nave impregnable in fortress, said to be the invention of some Mr. Hall, an enterprising Englishman, who sends journeymen around the world to build "indestructible forts for the best bidder." I believe that three of this gentleman's assistants assistants and the world to build "indestructible forts for the best bidder." I believe that three of this gentleman's assistants and the United States shall consist only in devising means by which the new invention may be made available in Florida. As the protection of the affair—it certainly could not be manufactured in provinces, where cannon can not be rified without destroying four to ten—the forties of foreign invasion. If we not include it among the insects injurious and beginned to discover the primary can be presented by the free cont

The Pashions.

(Correspondence of the N. Y. Evening Post.) Panis, May 3

Would your readers, who may moralize for themselves on the foible in question, care, meantime, for a word or two on the "partienlar vanity" most in vogue here at this moment?
If so, let them learn that the era of plain tiesues appears to be passing, and that of patterns to be coming in. Silks, for instance, are now covered with small ornaments or bunches of flowers, imitating embroidery so faithfully that you can hardly believe them not to be done with the needle. Tarlatanes, Chambery gauzes and the other delicate tissues, showing themselves in anticipation of the dogdays, are embroidered in the same manner, but in amallar, overt act. broidered in the same manner, but in smaller overt act. patterns. The question of crinoline, for a short time threatened with the ban of the mode, has now been settled in an affirmative sense. The tyrant has, in fact, established itself more firmly than ever, and bids fair to maintain its supremacy for a long time to come. But instead of being turned into a bell, the aim of a and meats. Now, the want of wisdom in this counsel may be seen by a consideration of the following facts:

The tobacco planters of Kentucky will have no competition this year or next from their most formidable rival, Virginia. She is effectually driven from the field. Convulsed with an intestine war, which will most probably divide the excessively elastic; the cages being composed.

diven from the field Convulsed with an intestine war, which will most probably divide the State, and overrun by the armise of the United States and the Confederate States, it will be utterly impossible for her planters to raise anyther terly impossible for her planters to raise anyther producers in impossible for her planters to raise anyther producers will make the raising of any product, save those which are absolutely necessary, wholly impossible. But even if tobacco were raised in Virginia, it could not be expected under the rigorous and vigilant blockade which is now shutting her ports, in common with those of all other Confederate States.

The tobacco trade of Virginia is annihilated for two years, at all events, and the entire business of supplying the lumense bome and for eight demand, becomes the learning temporate in common with those of all other Confederate States.

And all events and the entire business of supplying the lumense bome and for eight demand, becomes the learning temporate in the price of the confederate States.

The tobacco trade of Virginia is annihilated for two years, at all events, and of course there will be no resulted in the confederate States.

The tobacco trade of Virginia is annihilated for two years, at all events, and of the confederate States.

The tobacco trade of Virginia is annihilated for two years, at all events, and of the confederate States.

The tobacco trade of Virginia is annihilated for two years, at all events, and the entire business of supplying the lumense bome and for eight demand, becomes the learning temporate the continuous of a plain color—a gray telefates, for institution of the ward of a plain color—a gray telefates, for institution of the ward of the will be not constituted by the plaint of a plain color—a gray telefates, for institution of the ward of the will be not constituted by the ward of the ward of the ward of th

Insects Injurious to the Grape Vine.

But President Davis' visit was an important one. He came here, I understand, to canvass

Late and Interesting from Pensacela head, are also among the favorite styles. Gold ornaments are not worn in the bouncts of well dressed people; but ribands embroidered with straw, and smill plumes of feathers tipped and sprinkled with specks of straw, are much worn, and writes from Pensacela, on board the frigate Powhattan, on the 13th inst., as follows:

But President Davis' visit was an important one. He came here, I understand, to canvass will be better refined.

commission of high crimes against humanity.— The framers of the Constitution, therefore, made the rule which we have quoted, and

nal segments are swollen, presenting the appearance of minute prolegs. About the beginning of June the larve descends and enters the ground for a short distance, and speedily undergoes its transformation to a pupa, changing into a perfect beetle, issuing from the ground in about sixteen days from the time of entering; there are several broods in the season, and all feed on the vine; the last in the fall remains in the ground until spring. The perfect insect is usually of a uniform steel-blue color, but many are greenish or purplish, and of a brilliant metallic appearance; antenne, eleven jointed, of moderate length; thorax and elytra impunetate; length,

emissaries, spies and agitators in co-operaacts to promote the common end, become trai-tors and liable to be dealt with accordingly.

Another clause of the Constitution provides that: "No person shall be convicted of treason unless on the testimony of two witnesses to

the same overt act, or on confession in open This has reference to the trial of persons charged with the crime of treason, and ren ders necessary, under the construction put upon

"The place in which a crime was committed is essential to an indictment, were it only to show the jurisdiction of the Court. It is also essential for the purpose of enabling the prisoner to make his defence. A A description of the particular manner in which the war was levied seems also essential to enable the accused to make his defense. The law does not expect a man to be prepared to defend every action of his life, which may be suddenly, and without notice, alleged against him. In common justice, the particular act with which he is charged ought to be stated, and stated in such a manner as to afford a reasonable certainty of the nature of the accusation, and the circumstances which will be adduced against him."

It is not to be doubted that a man may be indicted and convicted for being connected with a treasonable attack upon Fort Sumter, shooning he was no nearer the scene of action than the "The place in which a crime was committed

SEVERE WEATHER IN EUROPE.—Accounts from Europe report that the weather since March has extraordinarily cold, with drought and sharp frosts, which have checked, and perhaps in many cases injured, vegetation. From the South of France it is stated that irreparable damage has been inflicted on the vines by the frost.
